

```
// Doesn't depend on Node.js (e.g. can be used in Cloudflare Workers)
import { renderPage } from 'vike/server'

// Any server: Express.js, Cloudflare Worker, AWS Lambda Function, Fastify, Hono, Nitro, ...
server.addMiddleware({
  method: 'GET',
  route: '*', // catch-all
  async handler(request) {
    const pageContextInit = { urlOriginal: request.url }
    const pageContext = await renderPage(pageContextInit)
    // `body` is the HTML of the page with a route matching pageContextInit.urlOriginal
    const { body, statusCode, headers } = pageContext.httpResponse
    const response = { body, statusCode, headers }
    return response
  }
})
```
